

Nurzaman Asyabani

Frontend & Fullstack Developer — React / Next.js · Node · PostgreSQL

Bandung, Indonesia nurzamanasya@gmail.com asyabani.github.io/portfolio github.com/Asyabani
linkedin.com/in/nurzaman-asyabani

SUMMARY

Frontend developer at Kawalu and fullstack developer at Exempli Gratia (EGDev), with four years of experience delivering production web applications — SaaS platforms, booking and point-of-sale systems, marketplaces, and company sites. Primary author of the Next.js 16 rewrite of kawalu.id and sole builder of its admin dashboard; at EGDev, responsible for client systems end-to-end, from data model and API design to UI, automated testing, and Dockerised deployment. Core stack: React/Next.js and TypeScript, with Node/Express, Laravel, Go, PostgreSQL, and MongoDB. Currently completing a Bachelor's degree in Information Systems at Universitas Terbuka.

EXPERIENCE

Frontend Developer · Kawalu

Mar 2026 — Present · Remote

- Lead the frontend rewrite of kawalu.id — an academic-services SaaS covering paraphrasing, AI humanizer, AI & plagiarism checks, a service marketplace, and freelance services — migrating an Express + EJS monolith to Next.js 16, React 19, TypeScript, and Tailwind CSS 4, including the service catalogue, order tracking, subscriptions, blog, and PWA support.
- Designed and built the admin dashboard as a standalone Next.js application for managing orders, services, and content, consuming the backend team's TypeScript/Express API through a fully typed client generated from OpenAPI/Zod schemas.
- Maintain automated test coverage with Vitest and Playwright, and deliver SEO, performance optimisation, and GSAP-based motion consistent with the production visual language.

Fullstack Developer · PT. Exempli Gratia Indonesia (EGDev)

May 2023 — Present · Tasikmalaya

- Deliver client systems end-to-end — data modelling, API design, UI, automated testing, and deployment — with Next.js/TypeScript, PostgreSQL with Prisma, Redis/BullMQ background jobs, MinIO object storage, Vitest + Playwright, CI on GitHub Actions, and Dockerised releases; serve as the primary technical contact for client teams.
- Developed Movora, a sports-venue booking platform — booking flow, payment processing, QR check-in, and team management — on Express, TypeScript, and Prisma, with real-time features over Socket.IO and MQTT; and Kasir, a role-based point-of-sale system covering cashier workflows, down-payment and full-payment schemes, invoicing, and sales dashboards.
- Leading the rewrite of Architract, a 3D/architecture asset marketplace, from Express + EJS to SvelteKit with a Go (chi, pgx) API on PostgreSQL 16 — JWT cookie authentication, Docker, and Dokploy deployment.
- Shipped Taxpoint (taxpoint.id), a tax platform in production, and the EGDev company site with its Three.js hero — UI/UX implementation, API integration, and SEO fundamentals.

Fullstack Developer (Bootcamp) · PT. GITS Indonesia

2023 · Bandung

- Completed an intensive fullstack bootcamp covering React.js, Go, Flutter, and Docker through project-based training.
- Built a game-voucher e-commerce platform as the final project with Laravel, React (Inertia.js), and Tailwind CSS — authentication, product management, cart, orders, payments, and invoicing.

Fullstack Developer · PT. Sevenlay Teknologi Indonesia

Jun 2022 — Dec 2022 · Bandung

- Designed, built, and maintained three web-based systems end-to-end on Node.js and Express.
- Implemented client-side interactivity and asynchronous data flows with jQuery and AJAX.

Frontend Developer · PT. Exempli Gratia Indonesia (EGDev)

Jan 2022 — Jun 2022 · Bandung

- Implemented 10+ responsive, production-ready websites from UI/UX designs.
- Frontend developer for SiapQurban, a qurban commerce web application supported by Bank BJB.

SELECTED PROJECTS

Kartinis BMS

Apr 2026 — present

Sole developer (EGDev project for Kartinis Label) — architecture, data model, API, UI, testing, deployment; direct contact with the client team

Business management system for Kartinis Label that connects R&D, production, marketing, finance, and warehouse in one platform — tiered approvals, two-stage QC, vendor scorecards, and P&L — designed, built, and shipped solo.

Next.js 15 · TypeScript · React 19 · Tailwind CSS 4 · shadcn/ui · PostgreSQL 16 · Prisma

Kawalu · kawalu.id

Mar 2026 — present

Frontend developer at Kawalu — Next.js 16 rewrite (primary author) and admin dashboard (solo)

Academic-services platform — paraphrasing, AI humanizer, AI & plagiarism checks, document fixes, marketplace and freelance jobs. I build its frontend rewrite from an EJS monolith to Next.js 16 and its admin dashboard.

Next.js 16 · React 19 · TypeScript · Tailwind CSS 4 · GSAP · PWA · Vitest

Architract

Aug 2026 — present

Sole developer on the rewrite — frontend, API, data migration blueprint, deployment

Marketplace for architecture and 3D visual assets, rewritten from Express + EJS to SvelteKit on the front and a Go API (chi + pgx) on PostgreSQL 16 — JWT auth in httpOnly cookies, Docker, Dokploy deploy.

SvelteKit · TypeScript · Go 1.25 · chi · pgx · PostgreSQL 16 · Docker

Movora

Sep 2025 — Mar 2026

Frontend & feature developer in a team of four — home, booking flow, payment, QR check-in, teams

Sports-venue booking platform: court booking by sport and time slot, payments, QR check-in, teams and community matchmaking — Express + TypeScript + Prisma with Socket.IO and MQTT.

Express · TypeScript · Prisma · Socket.IO · MQTT · MinIO · EJS

Full case studies with screenshots: asyabani.github.io/portfolio/projects

SKILLS

Frontend	React 19 · Next.js 15/16 · TypeScript · Tailwind CSS 4 · SvelteKit · GSAP · Three.js · React Native · Expo
Backend & data	Node.js · Express · Laravel · Go (chi, pgx) · PostgreSQL · Prisma · MongoDB · Mongoose · Redis · BullMQ · Socket.IO · MQTT · REST · OpenAPI/Zod
Quality & delivery	Vitest · Playwright · GitHub Actions · Docker · Compose · MinIO / S3 · Nginx · SEO · Figma

EDUCATION

Universitas Terbuka · Bachelor of Information Systems	2023 — 2027
SMK Negeri 2 Tasikmalaya · Sistem Informatika, Jaringan dan Aplikasi	2019 — 2023

CERTIFICATIONS

- Junior Web Developer — VSGA Digital Talent Scholarship, KOMINFO (Aug 2023)
- Dicoding — Front-End Web untuk Pemula (2024), Dasar Pemrograman Web & JavaScript (2023), Memulai Pemrograman dengan Kotlin (2022)
- Edspert.id mini bootcamps — Introduction to React JS, Introduction to Flutter (2023)
- Progate — Web Development Path, Node.js (2020)
- Cyber Security Training — CompTIA Linux+ / Security+ / PenTest+ modules, InfraDigital Foundation (2021)
- DQLab — Introduction to Data Science with R (2023)
